Subject: Technical Review of Class III uranium ISR draft permit?

Greetings Phil: is there any chance someone in EPA R6 has the experience and time to review our first Class III uranium ISR draft permit (for the Dewey Burdock project)? I realize that Ex.6 Personal Privacy (PP)

Ex.6 Personal Privacy (PP)

but didn't know if there was someone else in your snop wron Ex.6 Personal Privacy (PP) but didn't know if there was someone else in your snop wrth comparable expertise, etc. We feel pretty confident of the permit conditions we will be proposing, but its always good to have another practicioner's technical review.

Thanks for considering and I look forward to seeing you in Austin next month,

Douglas
